Subject: ELC FY 2012 FOA Correction to West Nile Virus and Other Arboviral Diseases Component

Dear ELC Grantee/Applicants:

Page #39 of the FY 2012 ELC FOA (CDC-RFA-CK12-1201) in the 'West Nile Virus and Other Arboviral Diseases' Program Component area contains an error relating to the reporting period. Baseline reporting in this application should be for the period from January 1, 2011 through June 30, 2011. Please see below for the correct language.

"Please note that the reporting period of interest is the calendar year (January through December). However, since progress reports are due in late summer, data should be initially reported for the 12-Month period of July January 1, 2010 2011 through June 30, 2011. During March of the following year, CDC will work with grantees to validate data for the period of time from January, 2011 through December, 2011."

Please contact me or any of the ELC Program Advisors should you have questions.

Thank you,

Alvin Shultz, MSPH
